Joan,

I can't think of any other names, but Roger may, so I'll let him weigh in.

Just wanted to mention that we may not need one of the Q's in the Q&As:

Ex. 5 Deliberative Process (DP)

Rick

Subject: Chemours

Folks –

As many of you know, Chemours has sent a positive response to our request for GenX sampling at their Washington Works facility and area.

Cosmo wants us to develop a rollout plan for how we're going to notify all interested parties in a consistent and timely manner, including reporters who have been covering this story and making inquiries, outside attorneys who have been reaching out to EPA re this particular site, congressional and local officials.

We've developed the attached comms plan that we need to share with HQ and R5. Before doing so, please let me know if there are additional names for interested stakeholders in R3 we need to add to the rollout. I would appreciate receiving this information by 10 a.m. today so we can share with HQ.

The plan is that we make our notifications tomorrow. Andy, it's been requested by the front office that you call Robert Bilott tomorrow to provide the information, as well as the letter or the link to the letter that will be posted onto the HQ website.

For future planning, we will need to discuss next steps once the data starts coming in. We have agreement from HQ that they will post the data onto this same website once we share it with them.

Once I have your input and that from HQ and R5, I will share the final comms plan with you.

Thank you for your cooperation.

Joan
